

English Guided Architectural Tour Meguro City Office Building Complex

2024

The Complex designed by Murano Togo in 1966

Meguro City Office building complex was originally built as headquarters of Chiyoda Insurance Company in 1966, converted into city office with minimum renovation in 2003. It was designed by Murano Togo (1891-1984), a renowned Japanese architect, and is considered to be one of his major work. Meguro Museum of Art, Tokyo (MMAT) has been organizing architectural tour of the complex in Japanese since 2004. The tour is held four times a year and has attracted many participants each year. The tour will explore various points throughout the building where Murano style is distinct and skillful craftsmanship of the time is well preserved, sharing the excitement of studying this rare example of surviving building by the architect.
